

FIXTURE NUMBERING SYSTEM

Generally, the first (Thousandth) digit represents the location of the fixture: 1xxx is Truck, 2xxx is Second Unit, 3xxx is Stage A and so forth. The second (Hundredth) digit represents fixture type (Manufacturer): x1xx is Arri, x2xx is Astera, etc. The 'fixture type' (Hundredth) digit may be different from truck package to stage if there are rigged fixtures that we don't carry on the truck.

In essence, fixture 6205 would represent the 5th (6205) Astera (6205) fixture on Stage B (6205).

Should the stage(s) require more fixtures than can fit within this system, ONLY use this system for the 1st and 2nd unit truck packages

DIMMERS: 1-999

TRUCK: 1001-1999

ARRI: 1101-1199

ASTERA: 1201-1299

CREAMSOURCE: 1301-1399

LITEGEAR: 1401-1499

OTHER: 1501-1599

OTHER: 1601-1699

OTHER: 1701-1799

OTHER: 1801-1899

OTHER: 1901-1999
